## THE OPENING OF THE COMPONENT REBUILD CENTER

Being the exclusive dealer of Caterpillar Inc. in the Republic of Armenia, Zeppelin Armenia LLC follows the slogan “Professionals rely on CAT.”

In April 2012 the Contamination Control audit was performed in Zeppelin Armenia LLC by Caterpillar. As a result, 4 stars have been granted to Zeppelin Armenia LLC, which is the highest score ever granted to the dealerships in CIS countries so far. We believe that in coming years Zeppelin Armenia LLC will obtain the maximum score of 5 stars.

On May 16, 2012, an official opening ceremony of world-class CRC (Component Rebuild Center) took place at the head office of Zeppelin Armenia LLC, where the main base of operations is located. This was one more step for Zeppelin Armenia LLC to the highest quality of service provided to the customers. With CRC Zeppelin Armenia LLC becomes the most developed service provider in the local Armenian market. The investment of more than 1 million USD underlines the commitment of Zeppelin Group to its long-term interest in Armenia.

Zeppelin Armenia has now the opportunity to offer Armenian customers the overhaul of construction and mining equipment of such components as engines, final drives, transmissions, torque converters and suspensions.

Local customers of Zeppelin Armenia, the Ambassadors of Germany and United States of America, and guests from Armenian government were present at the official opening ceremony, where the first engine s/n 3512B of 130 t Off-Highway Mining truck 785C was officially handed over to Zeppelin Armenia LLC by Zangezur Copper Molybdenum Combine for overhaul.

In their opening speeches Mr. Peter Gerstmann, CEO of Zeppelin GmbH, and Mr. Mumin Azamkhuzhaev, CEO Caterpillar Eurasia LLC, have mentioned that Zeppelin Armenia LLC, being the youngest in Zeppelin family both with its sales and service growth, exceeds most dealerships in CIS countries.
